

WOODEN SPORT FLOORS

ADIFITNESS

Adifitness is a kind of sport flooring, designed especially for fitness facilities and sports halls that require **good flexibility**, a **low thickness** of the flooring and a **low cost**.

It is optimal for gyms in general, and school gyms, which have no particular requirement for technical and higher level performances.

Sports flooring/parquet **ADIFITNESS** with CE marking, composed of a sheet of **nylon** vapor barrier extended to all the substrate surface (in order to avoid any humidity penetration) upon which is placed in work, the sports performance system composed of:

- **Polyurethane Mat** can provide the right elasticity to the system, with shock absorption optimizing action and the subsequent release of energy.
Thickness: 10 mm.
- **Pre-finished parquet 3 strips 14mm**, **BEECH/OAK** essence, with special click joint on its long sides and heads, which ensures a perfect seal in tension and flatness of the paving and prevents the detachment of the boards one from the another.
Noble wood: 4 mm.

Overall Adifitness thickness: 24 mm.
